

# LED SPOT

## Technical data

|                                                                             |                   |
|-----------------------------------------------------------------------------|-------------------|
| Number of LEDs                                                              | 2 points × 1 LED  |
| Supply current for each LED point                                           | 350 mA            |
| Recommended constant current power supply<br>(max. 8 SPOT points in series) | TRIDONIC 87500274 |
| Power of each SPOT point                                                    | 1,05 W / 1LED     |
| Color temperature                                                           | 3000K             |
| Luminous flux of each SPOT point                                            | 68 lm / 1LED      |
| Beam angle                                                                  | 30°               |
| Operating temperature                                                       | -10°C .. 40°C     |
| LED lifetime                                                                | >36000 h          |
| Degree of protection                                                        | IP20              |
