Step nosing LED profiles

Lighting solutions for cinemas, theatres, HORECA, public transport and more

Cinema LED profile system

LED and LumiTEC systems integrated into LARS stair profiles are an ideal solution for cinemas, theatres, clubs, museums, and transport. They perform perfectly wherever dimmed interiors make it difficult to see steps, edges, or turns. Durable and energy-efficient, these profiles enhance safety while also serving a decorative function thanks to full control over lighting effects.

CABLE COVER SYSTEM

CROSSLINE

The world's first cable cover system with LED lighting. A robust, metal cover protects the wires from damage, laying them on the surface of the steps without any milling. The optional illumination effect adds the „wow-factor“ to the space.

Available with DUO LED UNI and STEPLINE.

LED ROW SIGN

KINGKONG

The KingKong LED sign features the largest illuminated digit surface. It offers full customization and can include logos, symbols, or any text. Made from durable metal, it is designed for installation both in stair profiles and on seats, walls, or floors.

Available with STEPLINE, DUO LED UNI, BASELINE.

LED ROW SIGN

NO.1 & NO.2

Made from durable metal, it is designed for installation both in stair profiles and on seats, walls, or floors. It offers full customization.

No.1 available with STEPLINE, DUO LED UNI, BASELINE.

No.2 available with STREAMLINE, COMBO.

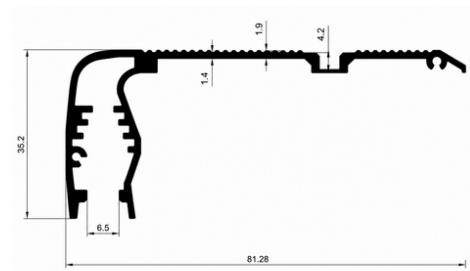

STEP PROFILE

BASELINE

Sleek aluminium profile with downward-directed lighting delivers a clean, linear lighting effect. An integrated cable management space makes installation easy. Optional custom LED markers are available - letters, numbers, or symbols -including the large KingKong row marker for enhanced visibility.

NEW

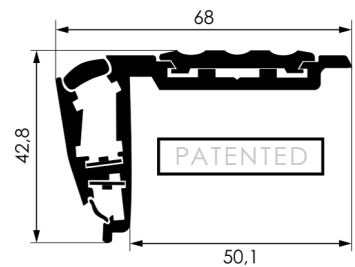

Profile colours:

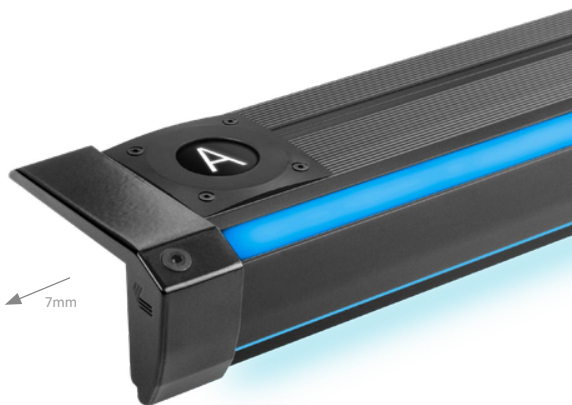

STEP PROFILE

STREAMLINE DUO

A profile that has it all: the anti-slip insert available in various colours, optional dual linear LED illumination, customized row mark, adjustable end caps and invisible screw holes.

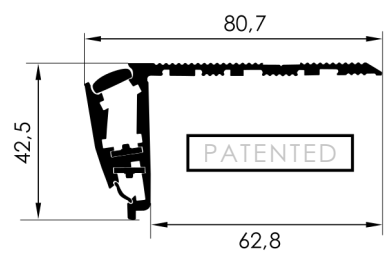

Profile colours:

STAIR PROFILE

DUO LED UNI

The UNIVERSal aluminum stair profile with dual LED illumination is our best seller. The profile provides a continuous aesthetic strip of light in a single colour or RGB colour spectrum. Now, it is also available with a linear illumination on the bottom.

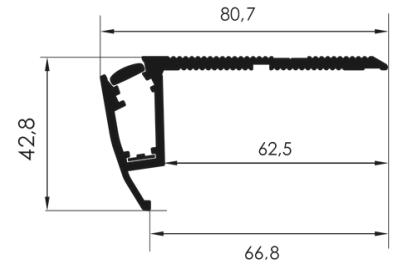

Profile colours:

STAIR PROFILE STEPLINE

A classic universal anti-slip profile that can be enhanced with illuminated custom symbols. It delivers a high-quality linear lighting effect while ensuring complete control over light distribution.

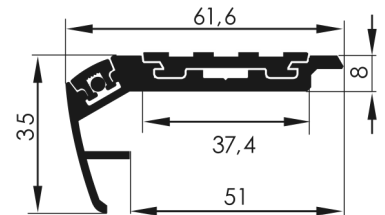

Profile colours:

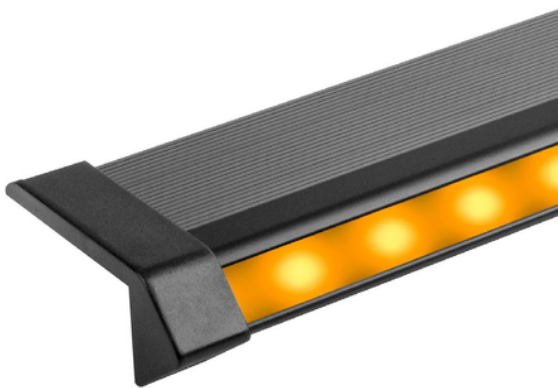

STAIR PROFILE COMBO

The COMBO profile features specially designed grooves that allow carpet to be installed beneath the profile. Its highly durable anti-slip insert ensures long-lasting performance in demanding applications.

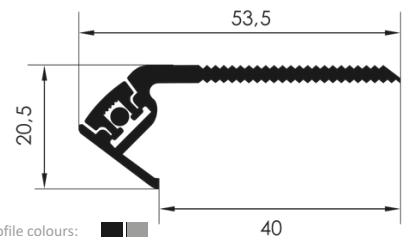

Profile colours:

STAIR PROFILE OVERLAPPED

An easy-to-install universal profile with anti-slip properties that creates a dotted lighting effect. A continuous line of light can be achieved by using a COB LED strip.

Profile colours:

STAIR PROFILE INTERNAL

Designed for installation in tiled staircases. A continuous line of light can be achieved by using a COB LED strip. A continuous line of light can be achieved by using a COB LED strip.

CORNER PROFILE

WALL

Simple installation and high-quality construction make WALL a popular choice. Its modular design enables efficient integration of lighting along the edges of walls, floors, staircases, and other architectural elements.

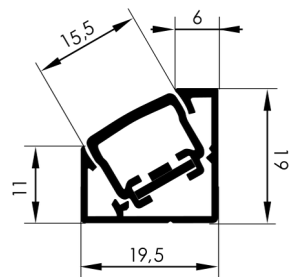

Profile colours:

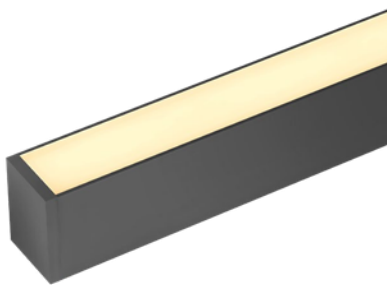

CORNER PROFILE

LA

The LA profile is designed for installation in corners where two surfaces meet. It is ideal for decorative lighting and can be mounted under cabinets, along skirting boards, and on ceilings.

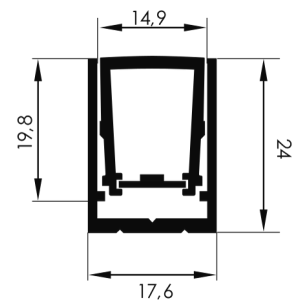

Profile colours:

UNIVERSAL PROFILE

LAP

A straight aluminium profile designed for installation on floors, walls, furniture, and other flat surfaces. Its versatile design makes it suitable for a wide range of architectural lighting applications.

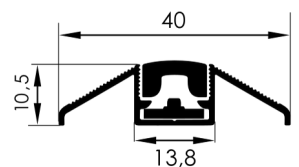

Profile colours: standard
 optional

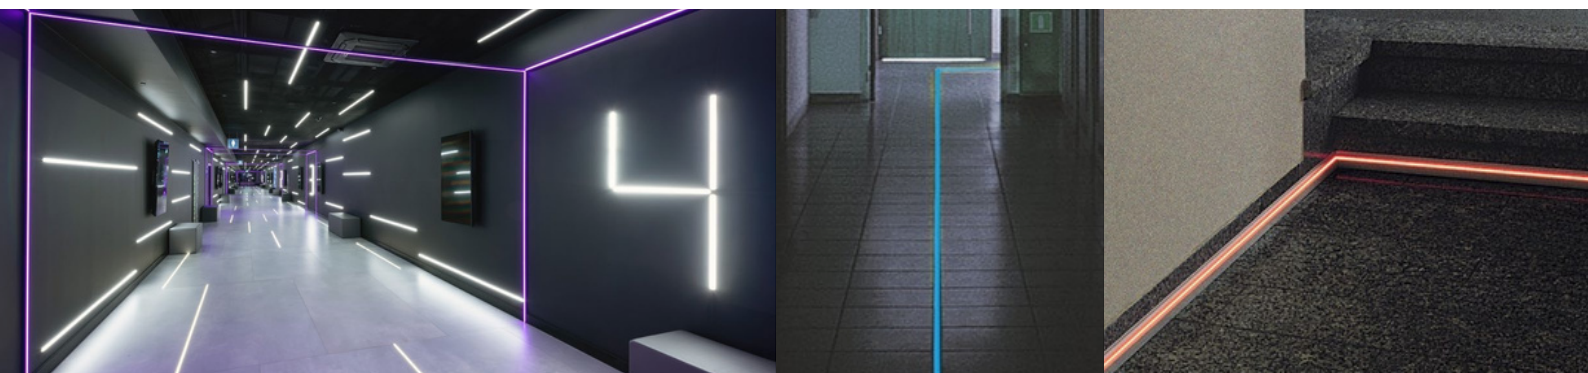

UNIVERSAL PROFILE

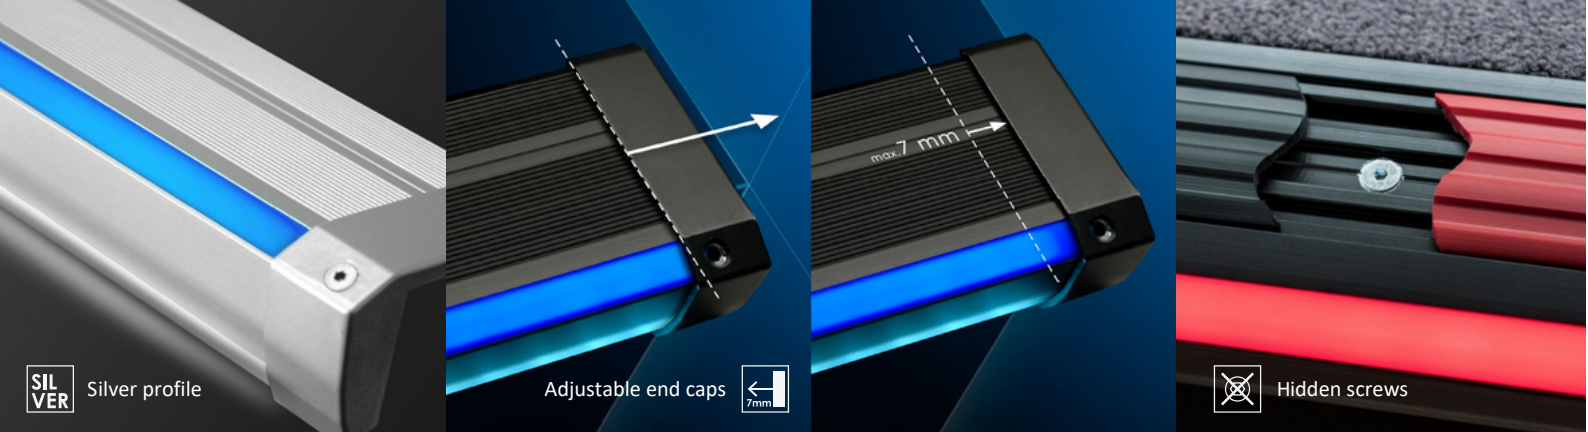

PRISM

The PRISM universal profile is designed for illuminating ceilings and floors without the need for surface chamfering. It provides a clean, integrated lighting solution while simplifying installation. A continuous line of light can be achieved by using a COB LED strip.
