

LedFlex Tape COB

Thanks to very densely placed LEDs in the COB strip, we can get a linear light without no single points are visible. The LedFlex will work out as a decorative element, illuminating stairs, suspended ceilings and kitchen cupboards. It can be successfully used in wardrobes, as well as attract the attention of customers to product displayed on a store shelf. The wight is only 5 mm, so it can be placed even in very narrow profile. The tape is characterized by low rated power.

Technical data

Rated power.	6W/M
Rated Voltage	24V DC
Light colour temperature	3000K / 4000K / 5000K
Energy efficiency	3000K - 90Lm/W 4000K - 95Lm/W 5000K - 95Lm/W
Power consumption	50.000 h
Safe operating temperature	Od -20°C do 40°C
Dimming capability	Tak
Protection level	IP20
Split section	13,89mm
Colour Rendering Index (CRI)	80
LED strip width	5mm
Energy efficiency class	A+
