

UNIVERSAL PROFILE

LM SLIM

The LM Slim profile is our newest and the smallest profile from the universal family. Its height is 4.05mm, available in two anodes black and silver. The profile is ideal for use on such surfaces as walls, furniture, shelves and similar areas that require the minimum dimensions of the profile. The covers with the "Easy-On" system is available in 4 color variants and gives us the possibility of IP65. As a result, the profile can be installed in places with high humidity such as bathrooms, changing rooms, sports clubs, SPAs, kitchens, etc. The undoubted advantage of this profile is the ease of bending, which allows us to implement unusual arrangements.
