

OVERLAPPED WIDE

The larger width of the profile allows it to be mounted even on fragile surfaces. In addition, the rough surface prevents slipping and provides comfortable and secure support under foot. Depending on the need, the profile can be screwed or glued to the finished edge of the step. The profile is made entirely of high quality aluminum, thanks to which it can withstand even heavy loads. The wide overlap profile is available in two lighting variants: LedFLEX or LumiTEC. The profile can also be supplemented with a personalized backlit symbol in a row.
