LARS - Manufacturer since 1965

LARS is a distinguished **high-quality lighting systems** manufacturer headquartered in central Europe.

With a rich legacy dating back to **1965**, LARS has evolved into a thriving threegeneration family business, dedicated to providing innovative lighting solutions that meet European quality standards.

A Pinnacle of High-Quality Lighting Innovation

LARS specializes in crafting **premium cinema LED profile systems** and LED stepnosing profiles, tailored to meet the unique demands of ambitious cinema projects. Our commitment to quality is unwavering, and we take pride in guaranteeing the superiority of our products.

LARS Lighting Enhancing Safety and Atmosphere

Designed for application in lowlight environments such as cinemas, theatres, and other public spaces, our LED lighting profile systems serve a dual purpose-guiding visitors with precision and enhancing safety while creating an immersive atmosphere. Distinguished by their durability and remarkable energy efficiency, LARS lighting solutions have the power to intensify the visual appeal and ambiance of any space they illuminate, making them an ideal choice for those seeking excellence in lighting technology.

RCROSSLINE

End cap 1 Tread cap L (left) 2 3 Angle cap CROSSLINE cable cover 4 Diffuser 5 6 LED strip 7 Wires 8 Row mark This product contains a light

This product contains a light source with energy efficiency class E, F, G. CROSSLINE is a brand new cable cover system with LED lighting. Created in answer to the need for **simple and aesthetic installation of cables** for LED stair nosing profiles.

Our specially designed profile allows you to **run wires without the need for surface milling**. In addition, it provides the completely new possibility of linear horizontal and vertical lighting of the steps, giving you the chance to create even more impressive lighting effects.

Thanks to the **metal structure and the highest quality** that characterizes the entire LARS family of products, the CROSSLINE cable cover system with LEDs sets a new direction in stair lighting for the entertainment industry.

CROSSLINE system is also available without LED lighting.

Crossline fits to Duo Led Uni and Stepline profiles.

STEPLINE

Stepline is a standard non-slip aluminum profile that fits any project. It not only enhances safety with illuminated step edges but also allows for personalized touches through optional illuminated markings like numbers, letters, or symbols. With Stepline, professionals can rely on guaranteed linearity of illumination and precise control over light intensity, ensuring a seamless integration of functionality and design in every project. This product contains a light source with energy efficiency class E, F, G.
